⌵ CH10 Question 4 data

Apr 26th, 11:41 pm

👍 1

@Corinne Steuk I thought the same thing at first, but notice the pre-view in the output only goes to page 100 which only shows the first 1,000 rows. If you run `table(substance_long$response)` you should see there are both 0's and 1's in the data.

Apr 27th, 12:25 pm

Mena Whalen ⭐

For part e of the questions it should be like this

```
substance2 %>%
  mutate_at(c("A", "C", "M", "R", "G"), ~abs(. - 2)) %>% ## make correct
  1,0's
uncount(count) %>%
  rowid_to_column(var = "id") %>%
  pivot_longer(cols = c("A", "C", "M"), names_to = "drug", values_to =
    "response")
```

I actually was able to use the previous code just by changing `cols =`
