Homework 2 Sakai/Project Data

#22

General

I see online submission is enabled in the Sakai assignment, I just wanted to confirm that we are allowed to upload a copy there to turn it in? Also, for the project, are there any restrictions on datasets in terms of size or number of variables? I'm not sure if it was a different class, but I recall seeing a list of websites with data available somewhere. Thank you!

Yes that submission option is possible for Sakai. I have moved back the timeline for project approvals and I will give more updated information about it soon.
