Absolutely. ~4/6-4/13 was especially hectic and challenging for me and so I wasn't able to get much work done then, but I finished all of the homeworks (except the chapter 9/10 questions to be added to the final 410 homework) over the past few days. I'm mainly having trouble finding a paper with data available. I've been searching the Loyola Libraries website but all the ones I find either don't have data available (a lot of them say to ask the author) or are too complex to reproduce. I just started the 410 project and compiling the data.

I never knew about incomplete grades, I wasn't sure what the process or eligibility is for that? Is this really a viable option? I can't find that much information on Loyola's website. Are there any downsides to having an incomplete grade? I would be interested in discussing but office hours overlap with my work schedule.

1. You don't have to do a link paper/project together you can do two separate things, like another paper review and another project.
2. You don't have to get replication perfectly, the idea isn't about replicating its about trying to read and understand what someone did and understand the complications the could come up if not properly communicated.
3. info about incompletes is here
https://www.luc.edu/media/lucedu/cas/pdfs/Student_Academic_Affairs_Policies.pdf
we would have to talk more about this option.
