Question about HW 5 Problem 20b

Apr 15th, 1:43 pm

Daniel Araujo

I'm having the same problem. I've tried to find other ways to do MLE in R without using the factanal function, but haven't found anything

Apr 15th, 3:10 pm

Rob Hand

The "psych" package has a couple different functions related to factor analysis. I wasn't quite getting results that seemed right with it yet, but maybe that's one worth looking into. I may mess with it a bit more as well.

Apr 15th, 10:11 pm

I am also having this problem. I would be interested to hear what others have done, as it looks like this subsequently prevents the ability to do problems 9.21, 9.22, and 9.23. I was hoping there would be some override/way to ignore the error and proceed anyway.
