Projects

I apologize if I missed this, but where/how do we turn in the project approval? Is there a document outlining the guidelines like for Paper 1? Is there a specific format on how to submit the data/analysis plan or how does that work?

I am pushing back the project (and thus the project approval) till after spring break. I want to be talking about PCA when you do the proposal part so that by the time we are done discussing PCA you can turn in the project. I will give updated information about it around spring break.
